

We have a number of reports that have been produced by the Institute, or in cooperation with other bodies. These reports may have arisen from research, or from conferences held at Gregynog or elsewhere. There is normally a charge for our publications, but in the interests of disseminating information we are happy to send out those listed below at just the postal charge. The list also gives a picture of part of the range of issues the IRH covers. If you are interested in receiving copies please list those you would like, plus your full postal address, and send to **Sian Gittins** at the Institute.
